Helping Build the Lifestyle you deserve.™

HomeLift's Performance Plus Plan provides the highest level of service, ensuring that your equipment retains its intended safety, reliability, and quality.

The Performance Plus Plan eliminates unexpected, costly repair bills by providing the same professional level of preventive care included in our Performance Basic Plan, as well as diagnosing and correcting equipment performance issues at no additional cost.

Our regularly scheduled preventive maintenance visits, which include inspecting, calibrating and lubricating of critical components before safety issues arise, mean long life for your equipment.

These inspections are performed at intervals consistent with the requirements of ASME A17.1 and A18.1, the National Lift and Elevator Safety Codes issued by the American Society of Mechanical Engineers. As a Performance Plus customer, your equipment will be code compliant, safe and running smoothly.

Should you need a repair, you will benefit from priority scheduling and rapid access to our local inventory containing the most common replacement parts for your equipment. This ensures that you will be up and running as soon as possible in order to accommodate your urgent needs.

You can rely on HomeLift's professional staff to deliver quality service. Our engineers and field technicians are established experts in our field, and we pride ourselves on our ability to care for your equipment's safety devices the right way, every time.

Statement of Coverage

YOUR PERFORMANCE PLUS PLAN WILL INCLUDE:

Factory-recommended maintenance at intervals specified for your accessibility product

Priority repair scheduling

Adjustment, repair or replacement of the following:
