CAMBRIDGE ELEVATING'S REMOTE MONITORING SYSTEM

STANDARD FEATURES

- Monitors your elevator remotely
- Provides on-demand health status updates
- Email alert notifications of error codes
- Avoid costly return service repair trips
- Included with your new elevator
- Smartphone, tablet or computer accessible

Our new Residential Elevator Remote Monitoring System is the next step in technological evolution of the home elevator industry. Our system allows your dealer to remotely view the status of your elevator by getting real-time health status updates and email notifications when a system event is present. Your dealer will be aware of any problems, which allows them to be proactive and prepared ahead of time for the call or site visit. This feature is currently available on all new elevators.
